25X1

GROUP III

1. The Rail Line: KYSHTYM-PERM-KIROV is located in our highest priority search area for ICBM deployment. This line has been closed to Western travelers since World War II.

2. Unidentified construction at BEREZOVKA, noted in Mission [REDACTED] strongly suggests the possibility of an operational ICBM deployment site in early stage of development. It is anticipated that sufficient time has elapsed to provide further indication of the purpose of the construction. Should this installation prove to be an ICBM launch site, it would aid in interpreting existing photography or new photography at other places.
